

### **Tours of our famous Haworth Motive Power Depot**

Encounter the excitement and nostalgia of the Loco works, with its exclusive sounds and smells, get up close to our fleet of Steam and Diesel locomotives with knowledgeable commentary from your experienced guide

Any, or all, of the current stock may be seen including:

Ivatt 2-6-2T 41241, resplendent in its re-opening day Crimson Lake livery, Standard 4 75078, S160 5820, 4F 43924 and Taff Vale Railway 0-6-2T No. 85 from the operating fleet and Standard 2 78022 and Lancashire and Yorkshire 'Ironclad' 0-6-0 no. 957, The Green Dragon in the film The Railway Children, undergoing restoration - and maybe more. Plus the members of our diesel locomotive fleet, all of which are stabled here when not in use.

These fascinating, behind the scenes, tours start from the Booking Hall at Haworth Station and will last for approximately 45 minutes. The tour involves walking on uneven and slippery surfaces, and includes steps. For this reason, it is not suitable for those with mobility problems. Regretfully open toed shoes are not permitted. Tours are limited to 16 persons. Access to the sheds is only permitted for authorised groups who must remain together at all times.

Please be aware that because this is both a hazardous and a working environment, tours may have to be curtailed or cancelled without notice. Children under 16, therefore, MUST be accompanied by a responsible adult.

Meet Your Guide at Haworth Station Booking Office at 14.00.

**There is no charge, but we do ask guests to consider making a Gift Aided donation, usually in the region of £5 to the KWVR Charity (no 1136853). Although the restoration of Ivatt Tank 41241 is complete and the locomotive is in service, all donations will go towards the funding of this KWVR iconic locomotive's overhaul.**
